

Horry County Petitions of Rights

Melissa Krupa () (232) (Comments)

854 Signatures

Goal: 1,000

We, the residents of Longs, Socastee, Bucksport and Myrtle Beach, having unilaterally suffered a loss of real property due to; flood waters, lack of sufficient water shed and sewage infrastructure, poor planning and zoning on behalf of the Horry County Planning Commission, as well as Horry County Council's disregard of its fiduciary duties in administrative adherence to;

- 1) Stafford act, (Title II sec 201 42 U.S.C 5131)
- 2) Stafford Disaster Relief Act. Amended 2016

3) South Carolina Local Government Comprehensive Planning Enabling Act of 1994

SECTION 6-29-510. Planning process; elements; comprehensive plan.

We hereby petition our grievance unto the Fifteenth Judicial Court. We humbly ask the court grant the attached temporary injunction until such time the Army Core of Engineers makes determination that the current and future "new" residential or commercial construction proposals, to include the Horry County "Imagine 2040 Plan"; that this temporary injunction be placed upon on the Horry County Council and Planning Commission until such new construction projects are deemed safe, without having a negative environmental impact within the current or future flood plain determined by FEMA within Horry County, or until such time any such infrastructure changes/ recommendations made by Army Core of Engineers has been reviewed and approved by the Horry County Council and Planning Commission.

We, the citizens of Horry county, who having suffered tremendous loss in equity, use of property, loss of real property, or having been forced to invest in our communities to greater extent of adding additional bank or SBA loans to rebuild our communities, plea to this court for relief from the burden of poor planning and proposals and ordinances by way of Horry County Council.

Whether intentional or unintentional, the grossly ignored flooding issues within our jurisdiction, not making such proposals for proper shedding of both the flood water and or sewage associated with natural disaster, while also adding additional residential neighborhoods which further compound a pre-existing flood condition, in legal terms, is a failure of a duty of care.

Further, It is the obligation of the county Council to act in a manner conducive to the well being of everyone around them, such as the prevention of any "foreseeable injury to a victim.". Passing such proposals, provisions and or ordinances, to include the use of updated impact studies, including outside (other/independent)

water shedding infrastructure adopted by other State and local municipalities is essential in the planning process of a reasonable municipal council. Failing to utilize these measure or failing address the current flooding issues that we are experiencing more frequently in nature, prior to passing such projects as the "IMAGINE 2040" project is a standard of conduct best defined as Negligence.

We the citizens of Horry County make this plea, that the attached injunction be granted by the court, as requested, to include the provisions stated within.

Sincerely,

Horry County Residents of Longs, Myrtle Beach, Conway, Socastee

Lived in my house for 21 years. Water in yard periodically yes. Water in the house no, until it flooded twice in 3 years. I believe this is because of the building of the subdivision called Silver Creek. Water used to be dispersed there now because it was raised up and developed the waterway has no where to go except into Socastee lower areas mainly ROSEWOOD.

Filling these wetlands in order to facilitate the greed of the county, will only make things worse for the people who reside here. Areas that have never flooded before have been filling with water. Our roads cannot handle more people. Contractors on these roads have bailed and left with \$3m+ unpaid. We are taxed to death already. Stop the greed. Stop the building. Let experts observe the current trends of our area, so we don't drown again.

The new roads designed under the RIDE program are atrocious. I could present a plan that makes way more sense. Who are these engineers anyway!? It's obvious they don't live here because they certainly do not understand our traffic patterns. The 707/Farrow Parkway exchange is ridiculous at best and cost us a small fortune. Y'all really need to get it together!

The cities and county are interested in collecting as much money for properties, like the Conway Golf Club and property under wires and over gas lines off of Hemingway Chapel Drive.

However, there is not sufficient time taken concerning the rezoning that each of these examples needs. The city and county Council seems to approve rezoning for the builders without the correct care needed to see the impact it would have on flooding or the existing neighborhoods. I urge you to take the additional time necessary before rezoning as many neighborhoods in Conway experienced devastating flooding that may have been avoided had enough time been taken before rezoning.

You need a moratorium against any new building. Try to improve the quality of life for people living here, rather than bringing new people in. You need to build infrastructure and other things rather than think of lining your pockets.

This is way overdue. I became homeless due to nothing being done about flooding. All this building has to stop. You can't take down every tree we have and not expect flooding issues. Plus we need Crabtree swamp cleaned out. Dredge the Waccamaw River would probably help. The county shouldn't allow another building permit to be issued due to flooding. Plus our roads can't handle the traffic we have now. We don't need anymore housing. And Anymore traffic in the area. More houses more people....more traffic. More flooding. It has to stop!

I agree 1000% that's why I will be running for county council next year . We have go to start planning for growth but the first step is to make sure we have taken care of every need and problem we already have! I also live in a flood area which is also in the same area if the dooms day road (501) if we can't get the road widened to at least 6 lanes all the way out of here and the water drainage issues there's no need to build any more houses!! If we allow this we're putting more lifes at risk plain and simple #VotePHIPPS2020

In the 11 years I have lived here I have never seen the swamp water from my door, my yard, and my driveway. Why is it so visible now? Why hasn't any one from Santee Cooper or any one been able to answer me. Why all of the sudden is the county paving driveways that hadn't been touched for years, why are they cleaning ditches that they haven't ever cleaned. I think it's to hush us and make us feel like we count for something. Tired of all the B.S.

Though we are new residents, we are already seeing the effects of overbuilding vs concern for the ecosystem. The Conway Loop Road, in particular, is an unnecessary boondoggle that will not relieve traffic so much as siphon new development into sensitive areas. Please consider what future generations will have to deal with when you approve new developments and infrastructure. I for one would rather see a redoubling of efforts to rebuild the 501 bridge; that alone would solve many traffic issues.

Our Conway home/property located in unincorporated Horry County has flooded 3 times during the last 4 years. Each year the flooding is worse than the time before. Yet Horry County officials continue to issue more permits that allow developers to denude the land by uprooting trees and filling in wetlands that are vital to absorbing the water runoff. A building moratorium for large tract developments needs to be enacted, a comprehensive plan to improve the existing roadways and bridges that are compromised and impassable after a big rain event and the Waccamaw River should be dredged and cleaned out. The needs of our current residents of Horry County should be addressed before enticing more people to move here from other places. Furthermore I-73 is NOT going to solve our flooding issues it will probably make matters worse!

The time is long past as to making good decisions regarding the overbuilding of Myrtle Beach and surrounding areas. It is the shameful reckless clearing of any and all trees to allow overbuilding with no regards to ecology, wildlife, and noise buffers. There is little if any news coverage announcing requests for building to let the people voice their concerns. We only find out after the fact. No trees, diverting water to the intracoastal, its no wonder there has been so much flooding and devastation to the people who live in those areas. Shame on you who run the governing of Myrtle Beach.

I am in North Myrtle Beach and we have been fighting about 18 months to preserve an area of land 9.4 acres we've named Ingram Dunes. The City Council has pledged \$500,000 and we just got a grant from the SC Conservation bank \$510,000 +we have raised close to \$100,000 but need approximately \$2 million. My point is this, these dunes are 50 ft above sea level, the trees,sand and high dunes help prevent flooding ,protect against hurricanes etc. I would think being the last dunes of this type the State would want to save this land. Unfortunately it's all about money not conservation of trees, land. Money is always the bottom line. Instead let's build 31 homes that will be empty 9 months of the year and take away the homes of all the animals living there.....

The over development of existing wetlands and the overdevelopment of that same land causing additional shedding and inability for the water to be absorbed into the soil. The fact that Horry County Council is letting the almighty dollar rule their decision-making process is nothing but pure de dyed-in-the-wool greed and I'm sorry that you think that that may not be a valid statement but you have done nothing to prove me wrong. When is the Horry County Council going to realize that they're damaging the environment and the beauty that once was Horry County no longer exist in many places because Horry County has allowed developers to wipe the Slate clean literally and figuratively

I, personally did not experience any of the flooding issues; but I feel great sympathy for those that did. I blame the county for every single inch of water that went into these houses. I remember when we were 'preserving the wetlands' now they are placing homes every where they can. I just don't understand it. We can talk until we are blue in the face and the County doesn't care. Every new home equals new taxes; more car taxes, etc. I believe the good -ole county boys are in the pockets of the Contractors which could be a conflict of interest if it was investigated. Some of these Council Members may even be part-owners of these Construction Companies. Ever thought about that. Funny how all the construction is being done by only a 'certain' number of contactors.

I live in Horry County and only a few blocks from the waterway. I have only lived in the area for a year but when I purchased my property no one disclosed to us the problems the area had in store for it's property owners from the county government not doing their job to correct the issues before giving more and more building permits when the problems are so prevalent.

Let's stop pretending that these are "100 year events" and do something about the drainage issue. If these floods happen again I, and many of my Polo Farms neighbors, will not rebuild yet again. Even if one has flood insurance - which I did and still do - the stress and physical toll are simply too much for a population that is largely older. As I approach age 78, I can not and will not do this again. The county is already facing a number of homes in which the owners simply walked away. A repeat event will leave a virtual ghost town.

There needs to be better planning when it comes to public infrastructure. This county is one of the fastest growing counties in the US and with all the new construction of communities comes the responsibility of thorough planning and oversight. With all the development and drastic changes to topical and geographical conditions, you would have to be an idiot not to question the impacts of the flooding as a result of increasing development.

I am wondering what improvements to infrastructure would be planned and made if there

were more doctors, lawyers, and "richer" folks having their homes repeatedly destroyed.... The hardworking people in Rosewood are pitied for sure by the town and county, but will be forgotten about shortly. Our lives and situations have been changed and devastated. People close to retirement now will have to keep working to pay off loans....think about that for a moment. Then know they are telling us the whole time we are trying to get our house back to livable everyone knows its going to happen again. We are stuck..can not leave (no money) and can not sell...

We also seek an Internal Affairs and State Ethics investigations into the personal benefits, and failures to recuse for Conflicts of Interest, for those government personnel who stood to benefit; whether through the commission of real property sales, brokerages, or leases of the developed lands in question.

The flood levels are rising. Flood Zones in Horry County cannot be accurately defined. Three years of record setting floods in the last 4 years is a clear sign, changes must be made. 1,000,000+ gallons of RAW, UNTREATED SEWAGE was dumped into our Waccamaw River following Hurricane Florence, where 70%+ of our drinking water is sourced, as well as 30,000+ acres of surrounding tidal Wildlife Refuge swamplands.

Our local government has demonstrated time and again that they are unwilling to comply

with current State and Federal Laws governing the roles and functions of local government. They are willfully, and negligently, approving over development that substantially manipulates our current and historical watersheds, disallowing them to function as natural water systems. The Horry County Planning and Zoning department as well as the current and past Horry County Council Members who actively voted to, or made documented actions to, approve the mass manipulation of our natural watershed should be held to account for their actions.

Sincerely,

Trenton Ventura

This is a special concern to us as Florence was our first flood experience and hope never again..

Nancy McKay

I have lived here for 24 years now and this is the worst flooding i have seen, and the first for my house. I was told when i purchased this property that it was NOT in a a flood zone, but here I am STILL NOT back in my home.

upvote reply show

My house never flooded before Florence. Now it can't be lived in, can't sell it and can't afford to rebuild it. The US Army Corp of Engineers and Horry County needs to fix the problem of flooding from the IC so this doesn't happen in another 2 years.

We must make sure that our natural resources are preserved in order to maintain livability and enjoyment for tourists. Constant, irresponsible building will only make our area unlivable and lead to a mass exodus of people and a great loss to the economy. By making this area too crowded with additional building will lead to an ugly environment. We need to fix our current problems and quit being greedy for more.

Marian Clark

We have been flooded twice, with fe ma insurance have to use money to rebuild, fear that it will happen again in the future. Something has to be done to stop this from happening .

Please help these poor people that have been flooded out multiple times and have lost everything. Why rebuild when this WILL HAPPEN AGAIN! something has got to be done. Prayers for all the people involved bless you all
